☼ [Monitor your solar plant and control the energy consumption with the new WebdynSunPM](#)

It automatically records the functional parameters, "business" data and environmental data for your installation...

🌟 Optimize radio data analysis with new LoRaWAN sensors and gateways

Thanks to a new range of sensors: counters, temperature, pressure, hygrometry, CO2, sunshine, and our LoRaWAN gateways, you can monitor your equipment and your environment using the latest LoRaWAN long-distance and low-consumption radio technologies...
