### New WebdynSunPM - Monitor and control your photovoltaic installations

---

Define your scenarios to modulate the power injected to the grid, optimise energy storage or manage your own consumption. A tailored standalone solution to monitor, control and optimise your photovoltaic installations.

---

[Read more](#)

---

**🌿 A complete line of environmental sensors with LoRaWAN protocol for your needs**

LoRaWAN is a telecommunications protocol that transmits communications at low speed by radio (868Mhz in Europe), from low electric consumption objects over long distances. In line with this new protocol, Webdyn is proposing a brand new line of sensors that meets the needs of new Smart City or Smart Building related services.
