WM-BUS, LoRa, both?
Which protocols for smart meter reading?

Protocols explanation: WM-Bus & LoRa

These M2M devices are the central link in the energy value chain and must communicate in the appropriate telecommunications protocol. This raises the question of the different technical solutions used for the transmission of information from field equipment. In the case of water and gas applications, wireless technologies are normally used.

WebdynSunPM Infography

Discover an infographic that will explain in 2 minutes what the WebdynSunPM does for your photovoltaic installations. It will become your essential gateway: define your scenarios to modulate the power injected on the network, optimize the storage of energy and manage your self-consumption. The current field tests are a success. She will soon be among your facilities.
