

REVA

Beyond Monitoring. Toward Performance
Transform your photovoltaic data into actionable insights.

MONITOR

Supervise all your connected photovoltaic equipment from a single platform.

ANALYSE

Analyse plant performance with intuitive dashboards and advanced analytics.

OPTIMISE

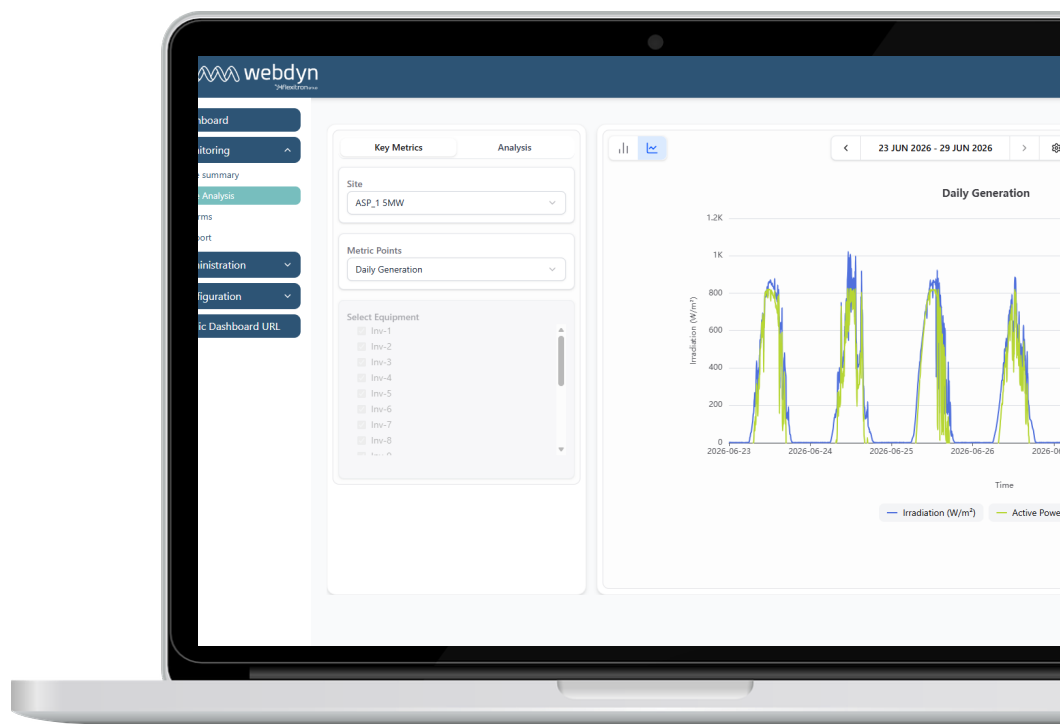

Receive real-time notifications and faults, make decisions that improve operational efficiency.

One platform. Complete Visibility.

Whether you operate a single rooftop installation or manage a portfolio of photovoltaic plants, REVA provides the insights you need to supervise your assets with confidence.

- Centralised supervision
- Interactive dashboards
- Performance analytics
- Portfolio management
- Real-time alerts
- Secure cloud access

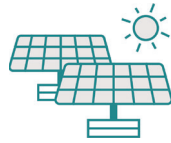

Webdyn ecosystem: gateway, accessories, portal

Monitor your photovoltaic installations and transform data into operational intelligence.

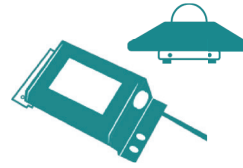

High-end Data Concentrators & Controllers

Reliable, robust & future ready IoT Devices

PM KUSUM Solutions

End-to-end monitoring solution for PM KUSUM projects

Weather Sensors

Accurate real-time weather data for optimised performance

Centralised Web Portal

REVA unified visibility, analytics & remote control

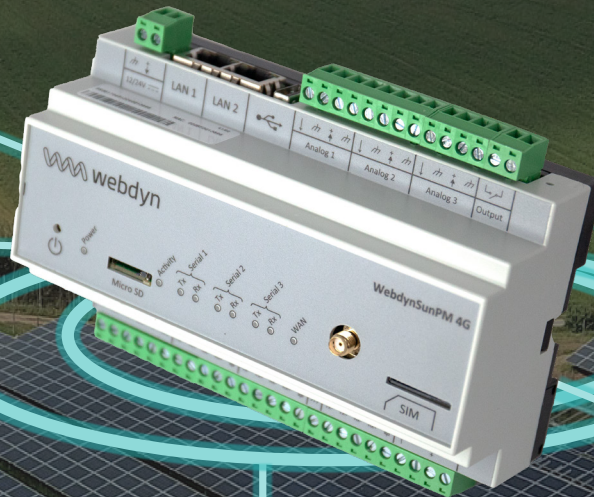

Powering the future of Energy Monitoring & Control
