

Temperature Module

Temperature transmitter module WDS-MT-04I

The module temperature transmitter is designed to deliver very high performance across varying ambient temperatures. Typically, temperature transmitters isolate, amplify, filter noise, linearize, and convert the input signal from the sensor then send a standardized output signal to the gateway (WebdynSun).

Technical Specifications

Descripción	Model WDS-MT-04I
Measuring range	0 to 100°C
Accuracy	± 0.3°C
Sensors	Temperature RTD Pt100Ω
Output	4-20mA
Supply voltage	12 to 26 VDC
Housing	Poly carbonate waterlight enclosure
Protection	IP-65
Weight	Approx 150gms
Reference	WDS - MT - 04I

The equipment may vary from the description in this document. Webdyn reserves the right to make changes to the product(s) and or information contained herein without notice. This document may not be considered as a contract specification.
