

PRESS RELEASE

EasyTunnel is Webdyn's new powerful industrial connecting IoT device

Webdyn launches the EasyTunnel, a powerful industrial device all-in-one solution with key functionalities and different possibilities, with a great potential thanks to its software. Due to its set of interfaces (RS232, RS485, dual SIM, digital I/O...) and the embedded new TITAN v6 firmware (Modbus, MQTT, IPsec, logger,...) ,it provides a full bundle of functionalities which will fulfill all your IoT applications needs with no need for further hardware, shortening the time-to-market and providing a very cost-effective solution.

The EasyTunnel includes a complete software that gives all functionalities for Industry 4.0 applications.

The EasyTunnel can be used in endless IoT applications, specially ideal for Industry 4.0 applications, Smart Home or Smart Building management (temperature and humidity monitoring, motion detection, room occupancy, lighting, frequency controller ...)

As new feature, EasyTunnel allows the user to develop and run user-programable scripts, based on JAVASCRIPT, which permits to program within the device particular functions for each application (edge computing).

Another functions will be the FIFO/LIFO modes, which offer different queue possibilities, SSL/TLS supported where it allows to work with secure protocols, and Automatic data sending (HTTP/HTTPS/FTP/FTPS/MQTT/MQTTs) with custom JSON format, using all kinds of communication protocols.

ABOUT WEBDYN

Webdyn is the brand of Flexitron Group dedicated to design and manufacture industrial IoT solutions, routers, modems and gateways for wireless communication GSM (LTE/4G/3G/2G), wired (RS232, RS485, Ethernet, etc.) and short-range wireless (Bluetooth), WiFi or LoRa). Its aim is to create a more sustainable and smart world through IoT, offering both communication devices and comprehensive solutions for all vertical sectors.
